CHAPTER 1: FOUNDER MASTER GUIDE

Founder Master Guide

Purpose

This manual is the **operating handbook** for the Founder/Administrator of **Prime Apparel ERP**. It provides a complete view of the system, step-by-step instructions for every control point, and best-practice recommendations for scaling, backup, and troubleshooting.

1 System Overview

- **Architecture** – Next.js (App Router) front-end, TypeScript API layer, Prisma ORM, PostgreSQL (Neon) back-end.
- **Core Modules** – Buyers, Inventory, Pricing, Orders, Invoicing, GST verification, CRM Memory Brain, RBAC/Department Management, Auditing, Dashboard visualisations.
- **Deployment** – Vercel front-end, Neon DB, CI/CD via GitHub Actions.

नोट: The ERP is built for Indian B2B apparel workflow – from sourcing → inventory → CRM → sales → dispatch → accounts.

2 Operational Philosophy

"sahi product lao, sahi rate pe lo, sahi price pe becho, aur right buyer tak sahi time pe pahunchao."

The system enforces this mantra through:

- **Quality Control** – QC module tags every batch.
- **Rate Optimization** – Pricing engine suggests optimal margins.
- **CRM Intelligence** – 360° customer view for perfect matches.
- **Logistics Scheduler** – Auto-assigns delivery windows.

3 Department Management & RBAC

- **Create / Edit Employees** – `Admin → Users & RBAC → Add Employee` .
- **Roles & Permissions** – Pre-defined per department (Purchase, QC, Pricing, ...). Override permissions per staff if required.
- **Block / Unblock** – Instant session revocation.
- **Audit Log** – Every admin action recorded – view under `Admin → Audit Logs` .

Quick Commands (CLI)

```
# List all departments
npx prisma db seed --preview-feature
# Add a new user (example)
node scripts/add-user.js --email alice@example.com --dept sales
```

4 GST Verification Workflow

1. **Enter GSTIN** in the supplier or buyer form.
2. System calls **GST Portal API** → CAPTCHA handling → verification.
3. If **ACTIVE**, GST details are saved and can be used for invoicing.
4. If **INACTIVE**, the invoice button is disabled and a warning is shown.

⚠ **Mistake:** Trying to generate an invoice with an inactive GSTIN will abort the transaction.

5 CRM Memory Brain

- **Customer Timeline** – All interactions, notes, payments displayed chronologically.
- **AI-Ready Hooks** – Future integration point for recommendation engines.
- **Notes & Pins** – Important follow-up items can be pinned for visibility.

6 Order & Stock Management

1. **Create Order** – Select buyer, add items, system auto-calculates GST & taxes.
2. **Stock Allocation** – Real-time inventory check; if insufficient, system suggests alternative batches.
3. **Dispatch** – Choose carrier, set expected delivery date, generate dispatch note.
4. **Invoice Generation** – Auto-filled with GST info, printable PDF.

7 Analytics & Reporting

- **Dashboards** – Sales funnel, inventory turnover, GST compliance heatmap.
- **Export** – CSV/Excel download from each dashboard.
- **Custom Queries** – Use Prisma Studio for ad-hoc data inspection.

8 Deployment & Backup

- **Vercel** – Connect GitHub repo; environment variables set in Vercel dashboard.
- **Neon** – Automatic backups; manual `pg_dump` can be scheduled via a cron job.
- **CI/CD** – GitHub Actions run lint, type-check, Playwright E2E on every PR.

Backup Routine (example)

```
# Daily dump
pg_dump $DATABASE_URL > backups/$(date +%F).sql
# Retain last 30 days
find backups/ -type f -mtime +30 -delete
```

9 Troubleshooting Checklist

SYMPTOM	LIKELY CAUSE	FIX
Login fails (invalid token)	JWT secret mismatch	Verify <code>JWT_SECRET</code> in <code>.env</code> and Vercel env
GST verification stuck	CAPTCHA service down	Check external API status, retry later
Stock not updating	Prisma schema out-of-sync	Run <code>npx prisma generate</code> and migrate
UI components not loading	Tailwind purge config	Ensure <code>tailwind.config.js</code> includes all pages

10 Future AI Scaling

- **Buyer Intent Prediction** – Feed CRM interaction data into a ML model.
- **Automated Follow-up Bots** – Use OpenAI API to draft follow-up emails.
- **Dynamic Pricing Engine** – Real-time market price feed integration.

Appendix

- **MASTER-ENGINEERING-[CONTEXT.md](#)** – Reference for architecture decisions.
- **API Docs** – `src/app/api/` folder contains OpenAPI-style comments.
- **Glossary** – B2B, GST, PO, SKU, etc.

Prepared for the Founder/Administrator – your single source of truth for mastering Prime Apparel ERP.

CHAPTER 2: PURCHASE TEAM SOP

Purchase Team Guide

Department Purpose

- **Responsibility:** Manage supplier relationships, create purchase orders (PO), negotiate rates.
- **Goal:** Ensure raw material availability at optimal cost.
- **Business Importance:** Direct impact on production lead-time and cost of goods sold.

Login Instructions

1. Open the ERP URL (e.g., `https://prime-apparel.vercel.app`).
2. Click **Login** → enter your corporate email and password.
3. After authentication you will land on the **Purchase Dashboard**.
4. Your role will be `PURCHASE_TEAM` – only purchase-related menus are visible.

Daily Workflow

1. **Check Supplier Requests** – Navigate to **Suppliers** → **Requests**.
2. **Create PO** – Click **New Purchase Order**, fill:
 - Supplier (search by name or GSTIN)
 - Item SKUs, quantities, expected delivery dates.

- System auto-calculates GST (if supplier GST is ACTIVE).
- 3. **Approve PO** – Click **Approve**; an email is sent to the supplier.
- 4. **Track Delivery** – Monitor **PO Status** (Pending → In-Transit → Received).
- 5. **Receive Stock** – On arrival, open **Stock Intake**, select PO, verify quantities, add batch numbers.
- 6. **Quality Check** – Trigger QC module (auto-opens after intake).
- 7. **Close PO** – Mark as **Completed**; inventory is updated.

UI Walkthrough (Screenshots)

 Purchase Dashboard

 New PO Form

Real-Life Example

Scenario: Need 500 meters of cotton fabric.

- Search supplier "ABC Textiles" → GST verified.
- Create PO #12345 with 500m, deadline 7 days.
- Approve → supplier confirms receipt.
- On day 5, receive partial 300m, log intake, QC flags 5% defect.
- Adjust PO, receive remaining 200m, close PO.

Mistakes To Avoid

- **Duplicate PO** – Always search existing PO numbers before creating a new one.
- **Wrong GSTIN** – Verify supplier GST status; an inactive GST blocks PO creation.

- **Incorrect Quantity** – Double-check units (meters vs. kilograms).

SOP Checklist (Daily)

- [] Review pending supplier requests.
- [] Verify all active GST numbers.
- [] Update PO status column.
- [] Perform daily stock intake audit.
- [] Log any QC failures.

Escalation Flow

- **Supplier issues** → Contact **Accounts** for payment queries.
 - **GST verification failure** → Alert **Technical Team** to check API.
 - **Critical stock shortage** → Notify **Founder** via admin alert.
-

Prepared for the Purchase Team – Hindi/English mix for easy understanding.

CHAPTER 3: QUALITY CONTROL & INVENTORY SOP

QC / Inventory Team Guide

Department Purpose

- **Responsibility:** Receive stock, perform quality checks, manage inventory levels, track batch numbers.
- **Goal:** Maintain high-quality inventory with accurate stock counts.
- **Business Importance:** Directly affects production efficiency and order fulfillment.

Login Instructions

1. Open the ERP URL and log in with your corporate credentials.
2. After authentication you will see the **QC & Inventory Dashboard**.
3. Role `QC_INVENTORY_TEAM` restricts view to stock intake, QC forms, and inventory reports.

Daily Workflow

1. **Stock Intake** – Navigate to **Inventory** → **Stock Intake**.
2. Select the pending **Purchase Order** and enter received quantities.
3. **Quality Check** – Open the QC form, record defects, and approve/reject batches.
4. **Batch Tagging** – Assign batch numbers and expiry dates.

5. **Inventory Update** – System automatically updates stock levels.

6. **Report Generation** – Export daily QC report for the founder.

UI Walkthrough (Screenshots)

 Stock Intake

 QC Form

Real-Life Example

- Receive 200kg of cotton from supplier XYZ.
- Log intake, run QC → 5% defect flagged.
- Reject defective batch, approve 190kg, assign batch #B2026-01.
- Inventory now shows 190kg available for production.

Mistakes To Avoid

- **Skipping QC** – leads to defective products.
- **Incorrect batch numbers** – causes traceability issues.
- **Not updating expiry** – may result in stock spoilage.

SOP Checklist (Daily)

- [] Verify pending PO list.
- [] Perform stock intake for all received shipments.
- [] Complete QC forms for each batch.
- [] Reconcile inventory counts.
- [] Export QC summary report.

Escalation Flow

- **QC failure** → Notify **Technical Team** for root-cause analysis.
 - **Inventory discrepancy** → Alert **Founder** via admin dashboard.
 - **Supplier issues** → Contact **Purchase Team**.
-

Prepared for the QC / Inventory Team – Hindi/English mixed for ease of understanding.

CHAPTER 4: PRICING TEAM SOP

Pricing Team Guide

Department Purpose

- **Responsibility:** Define product pricing, manage discount rules, apply GST calculations.
- **Goal:** Maximize margin while staying competitive.
- **Business Importance:** Direct impact on revenue and profit margins.

Login Instructions

1. Open the ERP URL and log in with your corporate email/password.
2. After authentication you land on the **Pricing Dashboard**.
3. Role `PRICING_TEAM` limits view to pricing tables, discount configurator, and GST settings.

Daily Workflow

1. **Review Market Data** – Navigate to **Pricing** → **Market Insights**.
2. **Update Price List** – Click **Edit Prices**, select product, modify base price.
3. **Set Discounts** – Open **Discounts** tab, define percentage or flat-rate discounts per customer segment.
4. **GST Check** – System validates GST applicability for each product.

5. **Publish** – Click **Apply Changes**; a version-controlled log is created.

6. **Audit** – Review **Pricing Change Log** for approvals.

UI Walkthrough (Screenshots)

 Pricing Dashboard

 Edit Price Form

Real-Life Example

- Need to increase price of “Premium Denim” by 5% due to raw-material cost rise.
- Open product, adjust base price from ₹1200 to ₹1260.
- Add a 10% seasonal discount for bulk buyers.
- Save and publish – system auto-updates all pending orders.

Mistakes To Avoid

- **Over-discounting** – can erode profit.
- **Incorrect GST rate** – leads to compliance issues.
- **Publishing without audit** – may cause unauthorized price changes.

SOP Checklist (Daily)

- [] Review latest market price alerts.
- [] Verify GST rates for all updated products.
- [] Approve or reject pending discount requests.
- [] Publish price changes before end-of-day.
- [] Log any manual overrides.

Escalation Flow

- **Pricing conflict** → Alert **Founder/Admin** for final sign-off.
 - **GST mismatch** → Contact **Technical Team** to update tax tables.
 - **System error** → Open a ticket with **Technical Support**.
-

Prepared for the Pricing Team – Hindi/English mixed for clarity.

CHAPTER 5: CONTENT TEAM SOP

Content Team Guide

Department Purpose

- **Responsibility:** Create and manage product content, images, descriptions, and marketing copy.
- **Goal:** Ensure product listings are accurate, attractive, and SEO-optimized.
- **Business Importance:** Drives buyer interest and conversion rates.

Login Instructions

1. Open the ERP URL and log in.
2. After authentication you land on the **Content Dashboard**.
3. Role `CONTENT_TEAM` shows only content management menus.

Daily Workflow

1. **Review Content Queue** – Navigate to **Content** → **Pending Updates**.
2. **Edit Product Page** – Click **Edit** next to a product, update:
 - Title, description (mix of Hindi & English), specifications.
 - Upload high-resolution images (via Cloudinary integration).
3. **SEO Settings** – Add meta title, description, keywords.

4. **Publish** – Click **Save & Publish**; changes reflect instantly on the buyer portal.
5. **Version Log** – System records an audit entry for each edit.

UI Walkthrough (Screenshots)

 Content Dashboard

 Edit Product Form

Real-Life Example

- Update "Cotton T-Shirt" description to include new fabric blend info.
- Upload three new angle photos.
- Add Hindi keywords "सुविधाजनक टी-शर्ट".
- Save and publish – the product page now shows updated details.

Mistakes To Avoid

- **Missing image alt text** – harms SEO and accessibility.
- **Incorrect pricing** – always double-check price fields; pricing is managed by Pricing Team.
- **Over-writing approved copy** – respect version control.

SOP Checklist (Daily)

- [] Pull pending content tasks.
- [] Verify image quality and SEO tags.
- [] Publish updates and verify on live site.
- [] Log any major copy changes.

Escalation Flow

- **Content review conflict** → Notify **Marketing Team**.
 - **Image upload failure** → Contact **Technical Team**.
 - **Urgent buyer request** → Alert **Founder/Admin**.
-

Prepared for the Content Team – Hindi/English mixed for ease of use.

CHAPTER 6: MARKETING TEAM SOP

Marketing Team Guide

Department Purpose

- **Responsibility:** Plan and execute marketing campaigns, manage brand presence, generate leads.
- **Goal:** Drive qualified buyer traffic to the ERP portal and increase conversion rates.
- **Business Importance:** Directly fuels the sales pipeline and revenue growth.

Login Instructions

1. Open the ERP URL and log in with your corporate credentials.
2. After authentication you land on the **Marketing Dashboard**.
3. Role `MARKETING_TEAM` restricts view to campaign, lead, and analytics sections.

Daily Workflow

1. **Check Campaign Performance** – Navigate to **Marketing** → **Campaign Overview**.
2. **Create New Campaign** – Click **New Campaign**, fill:
 - Campaign name, target audience, budget.
 - Select channels (email, social, WhatsApp – future integration).

3. **Launch & Monitor** – Press **Start**, then monitor real-time KPIs (impressions, clicks, leads).
4. **Lead Management** – New leads appear under **Leads** → **New**, assign to Buyer Hunting team.
5. **Report Generation** – At day-end, export **Campaign Report** (CSV) for analysis.

UI Walkthrough (Screenshots)

Marketing Dashboard

New Campaign Form

Real-Life Example

- Launch a “Winter Collection” email blast targeting 5,000 buyers.
- Set budget ₹50,000, schedule for 10 Oct.
- After launch, daily clicks rise to 1,200, leads to 150.
- Export report, share with Founder for ROI review.

Mistakes To Avoid

- **Incorrect target segment** – leads to low conversion.
- **Overspending budget** – violates financial controls.
- **Neglecting lead assignment** – delays sales follow-up.

SOP Checklist (Daily)

- [] Review yesterday's campaign metrics.
- [] Approve any pending budget requests.

- [] Assign new leads to Buyer Hunting.
- [] Export and back up campaign reports.

Escalation Flow

- **Budget overrun** → Alert **Accounts Team**.
 - **Technical issue with campaign tool** → Contact **Technical Team**.
 - **Urgent lead** → Notify **Sales Follow-up Team**.
-

Prepared for the Marketing Team – Hindi/English mixed for easy understanding.

CHAPTER 7: BUYER HUNTING SOP

Buyer Hunting Team Guide

Department Purpose

- **Responsibility:** Identify and qualify potential buyers, conduct outreach, and add them to the CRM.
- **Goal:** Grow the buyer pipeline with high-quality leads.
- **Business Importance:** Fuels the sales funnel and ensures continuous order inflow.

Login Instructions

1. Log in to the ERP URL with your corporate email/password.
2. After authentication you land on the **Buyer Hunting Dashboard**.
3. Role `BUYER_HUNTING_TEAM` shows only lead-generation menus.

Daily Workflow

1. **Lead Research** – Navigate to **Leads** → **New Research**.
2. **Add Lead** – Click **Add Lead**, fill:
 - Company name, contact person, phone, email, GSTIN.
 - System validates GST status in real-time.
3. **Assign Category** – Tag the lead (e.g., *Large Retailer, Boutique*).

4. **Enrich Data** – Attach notes, past interactions, and potential order volume.
5. **Submit** – Lead appears in **Leads** → **Pending** for the Sales Follow-up team.

UI Walkthrough (Screenshots)

 Buyer Hunting Dashboard

 Add Lead Form

Real-Life Example

- Research “Urban Fashion Co.”, verify GSTIN `27AAEPM1234F1Z5` is ACTIVE.
- Add as a lead, category *Large Retailer*, note expected 5,000 units per month.
- Submit – leads queue now shows the new entry for Sales team.

Mistakes To Avoid

- **Skipping GST verification** – will block later invoice creation.
- **Incorrect contact info** – leads to missed follow-up.
- **Duplicate lead entry** – clutter the pipeline.

SOP Checklist (Daily)

- [] Review target market list.
- [] Verify GST status for every new lead.
- [] Add notes and categorize leads.
- [] Submit leads to Sales Follow-up.

- [] Sync with CRM Memory Brain.

Escalation Flow

- **Invalid GST** → Notify **Technical Team**.
 - **Lead quality issue** → Discuss with **Founder/Admin**.
 - **Urgent high-value lead** → Alert **Sales Follow-up Team**.
-

Prepared for the Buyer Hunting Team – Hindi/English mixed for easy comprehension.

CHAPTER 8: SALES & FOLLOW-UP SOP

Sales Follow-up Team Guide

Department Purpose

- **Responsibility:** Follow up with qualified leads, manage order negotiations, close sales.
- **Goal:** Convert leads into confirmed orders and maintain healthy relationships.
- **Business Importance:** Direct revenue driver; impacts cash flow and inventory planning.

Login Instructions

1. Open the ERP URL and sign in with corporate credentials.
2. After authentication you land on the **Sales Dashboard**.
3. Role `SALES_FOLLOWUP_TEAM` displays only sales-related menus (Leads, Orders, Customer Timeline).

Daily Workflow

1. **Review Assigned Leads** – Go to **Leads** → **Assigned**.
2. **Contact Lead** – Click **Call/Email**, log interaction notes.
3. **Create Order** – When ready, click **New Order**, select customer, add line items, set delivery date.

4. **GST & Pricing Check** – System auto-applies GST and pricing rules.
5. **Confirm & Send Invoice** – Approve order, system generates GST-validated invoice PDF.
6. **Update CRM** – Add follow-up tasks, mark lead status (Negotiation, Won, Lost).

UI Walkthrough (Screenshots)

Sales Dashboard

New Order Form

Real-Life Example

- Follow up with "Metro Fashion" lead from Buyer Hunting.
- Negotiate 2,000 units of cotton shirts at ₹1300 each.
- Create order #SO-2026-045, set delivery 14 days.
- System adds GST ₹10 % and generates invoice.
- Mark lead as **Won** and schedule production.

Mistakes To Avoid

- **Missing GST validation** – leads to invoice rejection.
- **Incorrect delivery date** – can cause stock shortages.
- **Not updating CRM** – future team loses context.

SOP Checklist (Daily)

- [] Review leads assigned to you.
- [] Log all communications in CRM.

- [] Create orders for qualified leads.
- [] Verify GST and pricing before confirming.
- [] Export and send invoices.
- [] Update lead status.

Escalation Flow

- **Pricing dispute** → Notify **Pricing Team**.
 - **GST issue** → Contact **Technical Team**.
 - **Urgent order** → Alert **Founder/Admin**.
-

Prepared for the Sales Follow-up Team – Hindi/English mixed for ease of understanding.

CHAPTER 9: LOGISTICS & DISPATCH SOP

Logistics Team Guide

Department Purpose

- **Responsibility:** Plan and execute shipment of finished goods, manage carriers, track deliveries.
- **Goal:** Ensure timely, cost-effective delivery to buyers.
- **Business Importance:** Direct impact on customer satisfaction and cash-flow (on-time payment).

Login Instructions

1. Open the ERP URL and sign in.
2. After authentication you land on the **Logistics Dashboard**.
3. Role `LOGISTICS_TEAM` shows only shipment, carrier, and delivery-tracking menus.

Daily Workflow

1. **View Pending Dispatches** – Navigate to **Logistics** → **Dispatch Queue**.
2. **Assign Carrier** – Click **Assign**, choose a carrier (e-courier, truck, rail).
3. **Generate Dispatch Note** – System creates a printable PDF with order details, addresses, and barcode.

4. **Update Status** – As goods leave warehouse, mark **Shipped**; once delivered, mark **Delivered**.
5. **Track GPS** – If carrier provides live tracking, embed link in the order.
6. **Report Exceptions** – For failed deliveries, open **Exception Form** with reason and next steps.

UI Walkthrough (Screenshots)

 Logistics Dashboard

 Dispatch Note

Real-Life Example

- Order #SO-2026-045 ready for shipment.
- Assign carrier **BlueExpress**, schedule pickup tomorrow.
- Generate dispatch note, print, attach to package.
- After 2 days, carrier updates status to **Delivered**; system logs proof of delivery.

Mistakes To Avoid

- **Wrong carrier selection** – may increase cost or delay.
- **Missing address verification** – leads to failed delivery.
- **Not updating status** – creates inventory discrepancies.

SOP Checklist (Daily)

- [] Review Dispatch Queue.
- [] Verify shipping addresses.

- [] Assign carriers and generate dispatch notes.
- [] Update shipment status throughout transit.
- [] Log any exceptions and notify Founder if needed.

Escalation Flow

- **Carrier issue** → Contact **Technical Team** for integration.
 - **Failed delivery** → Alert **Accounts Team** for possible reimbursement.
 - **Urgent shipment** → Notify **Founder/Admin**.
-

Prepared for the Logistics Team – Hindi/English mixed for easy comprehension.

CHAPTER 10: ACCOUNTS & LEDGER SOP

Accounts Team Guide

Department Purpose

- **Responsibility:** Manage financial records, GST filing, invoicing reconciliation, and cash-flow monitoring.
- **Goal:** Ensure accurate accounting, regulatory compliance, and transparent financial reporting.
- **Business Importance:** Direct impact on profit margins, tax liabilities, and stakeholder trust.

Login Instructions

1. Open the ERP URL and log in with your corporate email/password.
2. After authentication you land on the **Accounts Dashboard**.
3. Role `ACCOUNTS_TEAM` restricts view to ledgers, GST filings, and financial analytics.

Daily Workflow

1. **Reconcile Invoices** – Navigate to **Accounts** → **Invoice Reconciliation**.
 - Match incoming payments with issued invoices.
 - Flag any mismatches for follow-up.

2. **GST Filing** – Open **GST** → **Monthly Return**.

- System auto-populates taxable sales & purchases.
- Verify amounts, then click **Submit** to the government portal.

3. **Cash-Flow Review** – Check **Cash-Flow Dashboard** for inflows/outflows.

4. **Financial Reporting** – Generate **Profit & Loss** and **Balance Sheet** reports (CSV/PDF).

5. **Audit Log Review** – Periodically review admin audit entries for any unauthorized financial changes.

UI Walkthrough (Screenshots)

 Accounts Dashboard

 Invoice Reconciliation

Real-Life Example

- Received payment ₹1,00,000 for invoice #INV-2026-089.
- Reconcile by matching payment reference; system marks invoice as **Paid**.
- GST filing for March: system calculates GST payable ₹9,000, submit to portal.
- Export monthly profit-loss report for Founder review.

Mistakes To Avoid

- **Missing payment reconciliation** – leads to overdue balances.
- **Incorrect GST figures** – may incur penalties.
- **Skipping audit log review** – can hide fraudulent activity.

SOP Checklist (Daily)

- [] Verify all new payments against invoices.
- [] Update cash-flow dashboard.
- [] Review any GST filing alerts.
- [] Export and back up financial reports.
- [] Scan audit logs for suspicious entries.

Escalation Flow

- **Payment discrepancy** → Alert **Founder/Admin**.
- **GST filing error** → Contact **Technical Team** for API debugging.
- **Financial audit issue** → Engage **External Auditor**.

Prepared for the Accounts Team – Hindi/English mixed for simplicity.
